Cogent Utility Computing

The Cogent Advantage

Distribute your content efficiently through Cogent Utility Computing. For those who have outgrown public cloud or CDN platforms, yet do not wish to build their own computing infrastructure, our combination of **managed servers** and **Tier 1 IP Transit** guarantees your applications and content are delivered to end users at light speed. We have placed servers in strategic locations across the globe to guarantee accessibility and speed. Utility Computing offers an uncomplicated, scalable, and cost-effective approach to managing your content and bandwidth.

Features

Cogent Utility Computing provides the features you need

Server Hardware	Network SLA
Linux OS or bare metal	24x7 Monitoring & Support
IPv4 addresses	Secure data centers
IPv6 enabled	KVM access option

Tier 1 Backbone Connectivity

Cogent's IP Transit & IPv4 addresses

Gigabit Ethernet	100 Mbps - 1 Gbps
10 Gigabit Ethernet	500 Mbps - 10 Gbps

Single or Dual NIC, Firewall options

Ask us about higher bandwidth connectivity

Highly Connected

Cogent's network is one of the most pervasive and interconnected in the world, with over 3,500 On-Net locations across 292 markets in 57 countries. Cogent also has direct connections to more than 8,240 other networks worldwide. Cogent owns and operates 101 data centers throughout North America and Europe.

Technical Details

Utility Computing Servers: state-of-the-art configurations with multiple CPU, RAM, Disk/Controller and Network options

Operating System: Linux (e.g. CentOS, Debian, FreeBSD) on mirrored disks or as bare-metal server for customer-installed OS (Windows, VMware, etc)

The Product

We listened to our customers and added servers to our bandwith offering. Our servers are dedicated to your private use — you can even virtualize your own environment. Now you can focus on your applications and content, and we'll handle the hardware and connectivity. We have strategically placed servers across the globe to guarantee accessibility and speed.

The Simplicity

There is no ambiguity in how much bandwidth you need or double-counting for replication and caching. Having dedicated pipes available 24x7 for your content ensures the best access possible for end users accessing your applications and content.

The Contract

The service is offered annually. You can easily scale the service to accomodate your growing needs. Speak to your Cogent Account Manager about contract specials.

The Pricing

We price our service transparently, with a fixed server monthly fee (including hardware, server management, colo space, power, and cross connects) and a bandwidth monthly fee per Mbps (burst up to port speed, truly dedicated). There are no hidden fees. Now you can enjoy Cogent's outstanding bandwidth prices, with servers included!
